EXPERIENCE

LTIMindtree

Data Engineer

Jul 2022 - present

Pune, India

- Involved in closely working to review the business specifications of the project and handling the ad-hoc requests by interacting with business analysts, clients and resolve the issues as part of production support and also gather ETL requirements.
- Created Talend jobs to load data into various Oracle tables. Utilized Oracle stored procedures and wrote few Java codes to capture globalmap variables and use them in the job.
- Automation and optimization of Talend jobs to load data in various layers by reducing the development time by 80%.
- Drove in a collaborative, Agile environment with daily stand-ups to receive design and feature business requirements.

Abhyast.in

Web Developer Intern

May 2020 - Apr 2022

Delhi, India

- Created an Edutech conferencing system along with additional features using Node.js, Socket.io and Node.js.
- Designed and developed an authentication page leveraging JSON Web Tokens, resulting in a decrease of unauthorized access by 90%.
- Constructed and deployed a total of 5+ web pages and was responsible for maintaining and updating the same.

DaveAI

Software Developer Intern

Oct 2021 - Dec 2021

Bengaluru, India

- Designed and Implemented scalable APIs and background workers for managing GET and POST requests using Python as backend that serves 100k requests daily.
- Implemented smart Chatbot using Python & JSON scripts that worked as sales assistants for e-commerce and retail clients.
- Led the development of several products from identifying system requirements and partner dependencies to workload balancing software implementation and testing.

EDUCATION

Bachelor of Engineering (B.E.) in Information Technology

Vidyalankar Institute of Technology, Mumbai, India

Jul 2018 - Mar 2022

GPA: 8.89/10.0

PROJECTS

Kooke's Café

MongoDB, Express, React.js, Node.js, APIs

[GitHub](#) | [Live](#)

- Kooke's Café is a Café/Restaurant Management System, which will help cafés/restaurants to optimize and control over the cafés/restaurants menu.
- This application helps the cafés to do all functionalities more accurately and efficiently. Café Management system reduces manual work and improves efficiency and rate of work.

Voom Meet

Node.js, Express, MongoDB, APIs, JavaScript

[GitHub](#) | [Live](#)

- Implement and tested an application for video and audio conferencing that runs through WebRTC protocols, with different numbers of users and different types of internet connection.

Up-Learn

Flask, Python, PostgreSQL, HTML, CSS, JavaScript

[GitHub](#) | [Live](#)

- Developed a full stack web-application where students can connect with other students/professionals, post their doubts and projects, get them reviewed by professionals, where as professionals can post the job/internship openings.
- Another section where it uses User based Collaborative filtering for recommendation of colleges based on scores.

SKILLS

- C++ | Python | Java | JavaScript | SQL
- Data Structures and Algorithms (DSA) | Flask | Django | React.js | Node.js | PostgreSQL | MongoDB | OOP | Git
